Phone: 657-500-0938

Email: sales@filterbridgesupply.com

Hours: Monday to Friday, 8:00 AM to 5:00 PM Pacific

Who we are

FilterBridge Supply is an independent supplier of filtration consumables. Enquiries go to the contact details below. Product names and brands are used for identification; they do not imply manufacturer authorization or agency endorsement.

What to send

Send the manufacturer and exact part number, quantity and unit of measure, destination, and original specification or filter list. For an agency request, include the RFQ reference, submission deadline with time zone, required delivery date, documentation and whether alternatives are permitted.

Product scope

The reference catalog includes sediment, carbon, pleated, string-wound, inline, deionization/media and RO membrane entries. Catalog coverage identifies products for review; it does not establish stock, availability, sourcing rights or suitability for a particular facility.

How we review a request

A person reviews specified products and requirements before confirming what can be quoted. Any alternative is identified separately and reviewed against specifications and acceptance rules. Similar dimensions or a cross-reference alone are not a compatibility guarantee.

What must be confirmed

Availability, lead time, freight, quote validity, terms and required documentation are confirmed for the actual request. Ask for manufacturer literature or vendor-onboarding documents so we can confirm what can be provided.

Formal bids

Website receipt is an enquiry acknowledgment, not formal bid submission or a delivery commitment. Agencies may require registration and submission through their official procurement portals.
